### SUMMARY

---

I am a sixth year student at Newbattle High School, Throughout my years of attending I've achieved over six national 5s alongside three highers so far but also during studying those subjects I have been volunteering and helping out during my break times and lunch times to help improve our schools digital wellbeing but also in our local community, as I and a few of my friends are the group behind getting devices to primary and Secondary schools in the local authority. But also at school we made sure that the digital displays around our school displayed the most recent news and content but then we also were there to just help out if anyone had a problem with their school issued device, it did not matter if you were a teacher or a fellow student, we were there every break and lunch with no exceptions.

### PROFESSIONAL EXPERIENCE

---
